

Ultra-SmartBin

Motion Activated Lid Keeps Hands Safe From Biohazardous Wastes

- Infrared Sensors detect motion and provide "touchless" opening of lid — no buttons to press. No handles to lift. No pedals to step on.
- Lid closes automatically three seconds after hand/object is moved from area — provides superior odor and infection control.
- Three sizes available to fit any application.

Part# 1575

Part# 1570

Part# 1573

Removable ring keeps liners secure — makes disposal quick and easy (liner not included).

Part# 1750: 2 gallon size is ideal for lab countertops — replaces open or exposed bags or containers that are easily spilled or damaged.

Inner bin is easily removed for quick liner replacement.

ULTRA-SMARTBINS
